

PREempt PROTOCOLS

INFECTION CONTROL PROTOCOL - CIRCULATING FOOTBATHS

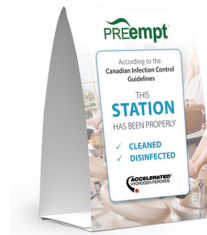

Disinfecting between each client

1. Fill the tub with cool water above all the water jets. Add *PREempt Concentrate* at 1:40 (approx. 400ml).
2. Turn on the jets and circulate for 5 minutes.
3. To reduce build-up of foam, add 2-3 drops of DEFOAM Plus.
4. Turn off jets and drain.

CIRCULATING FOOTBATH IS NOW CLEAN & DISINFECTED

Display **TENT CARD** at work station.

PREVENTS THE FORMATION OF BIOFILM.
