The 3 Brow Techniques

FULL BROW TECHNIQUE

The Full Brow Technique is the basic application that ensures a smooth and full-surface color build-up on the skin and hair. For a particularly intense look

Ideal for: Customers who want a strong effect or where a remodeling of the eyebrow is necessary, e.g. hairs are missing

OMBRE SHADING TECHNIQUE

The Ombre Shading Technique ensures a wonderful and gentle color gradient. The eyebrow is intensely emphasized in the back, while it becomes brighter, providing a very natural, feather-light look.

Ideal for: Customers who want a natural look and where no remodeling of the eyebrows is necessary.

BROW FILLING TECHNIQUE

The Brow Filling Technique provides a gently restrained effect. Here, the front area of the eyebrow is completely omitted and not colored. The transition between color and natural hair, is worked out with the rubber spoolie.

Ideal for: Customers who naturally have particularly dense, dark and intense eyebrows but want more contour and definition.
